SAGE X3 CONNECTOR

IMan's Sage X3 Connector provides bi-directional integration allowing you to integrate virtually any application or webservice with Sage X3.

THE PROBLEM

HUMAN ERROR

INEFFICIENT CUSTOMER SERVICE

POOR VISIBILITY

COSTLY MANUAL PROCESSES

THE SOLUTION

Sage X3 customers around the world use IMan to simplify their integration challenges and make their other applications run smoothly with Sage X3.

An integrated Sage X3 solution improves efficiency and reduces the number of manual tasks in your business.

WHAT CAN IMAN INTEGRATE?

- eCommerce – Magento, WooCommerce, Shopify, ZenCart, OpenCart, BigCommerce, marketplaces such as Amazon, EBay, Jet.com, Walmart, and custom developed solutions.
- Purchase & procurement and EDI.
- Concur Expenses.
- Manufacturing and niche verticals.
- Distribution and warehouse management – Complex transactional integration with third party logistics (3PL/4PL) providers, on-premise WMS's and shipping systems.
- Timesheet capture, billing, and job costing.
- Point of sale – a variety of POS systems integrating with the G/L, A/R and cashbook modules.
- Data Take-on & Automated Data Capture – Eliminate the complex and clumsy X3 import formats by using IMan to import take-on data easily and to speed up repetitive data entry from simply laid out Excel or CSV files.

KEY FEATURES

- Seamless & tight integration between Sage X3 and almost any other application.

- Automated bi-directional integration between Sage X3 and other applications removing the need for manual processing.

- IMan can be customised to transform data to match any business process.

- Integration is made through the Sage X3 webservices ensuring data is validated and business logic maintained as per the SAFE X3 object or subprogram.

- Able to integrate with any published SAFE X3 object or subprogram.

- A growing number of automated functions/SAFE X3 extensions are included with the connector.

- Dynamic schema discovery means IMan is able to detect changes and extensions to the SAFE X3 objects / data schema and is able to integrate with these extensions consistent with their logic.
